

GENiE Smart Factory Solution Boosts Smart Manufacturing In Malaysia

Galactic Advanced Engineering has launched its cloud-based process intelligent solution—GENiE Smart Factory Solution, which aims to increase adoption of smart manufacturing practices in Malaysia and the region.

GENiE Smart Factory Solution enables better decision making on the production floor through data analytics, by obtaining real process values and parameters of production operations. The solution address common problems encountered by manufacturers such as under-utilisation of machinery, production wastage, unpredicted down time risks and high usage of energy.

"It is a scalable investment to improve operations and more importantly to reduce downtime and financial losses from production interruptions. The savings from energy utilisation, reduction of wastage and better yield from the machines can be seen within months," said Sakhtivel Narayanasamy, CEO of Galactic Advanced Engineering.

He is optimistic about the government's commitment and efforts in driving adoption of Industry 4.0. "There has been much concept talk about Industry 4.0 and its power to revolutionise but we believe these concepts can be converted into applicable solutions like the GENiE Smart Factory that enables an innovative shift in manufacturing operations for the next three years."

ANCA Sheet Metal Solutions Launches New Thailand Facility

Anca Sheet Metal Solutions has launched its new, state-of-the-art manufacturing facility in Thailand. The company offers a comprehensive set of service in the metal fabrication industry.

"The business has grown significantly over the last couple of years as we gained customers in the automotive, food processing, construction and aerospace industries. We have invested in new equipment and refurbished the building to meet this growing market demand," said Frank Holzer, ANCA Sheet Metal Solutions General Manager.

"We have taken a dynamic approach, using vibrant colours and punchy angles, to ensure we stand out immediately in the sheet metal and fabrication industry. Having a strong brand is one of the most effective business tools you can have, and I am confident that with our new identity we will see great success. We pride ourselves on our service, quality and global network servicing customers across the world," he continued.
